Allowable Subject Matter

1. Claims 1, 2, and 5 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The closest prior art of record, EP 709906 A1 discloses a process of producing a positive electrode for a secondary battery where the process comprises the steps of calcining a raw material containing a lithium compound under an oxidizing atmosphere to produce calcined powders; forming the calcined powders to shape of an electrode after mixing with polyethylene powders (organic polymer particles), and calcining the formed (shaped) calcined powders under an oxidizing atmosphere at a temperature that is equal to the temperature used to calcine the raw material to produce the calcined powders and for a period of time that is shorter than the period of time conducted for calcining the raw material to produce the calcined powders.

However, the reference does not disclose, teach, or suggest the distinguishing feature of calcining the formed (shaped) calcined powders under an oxidizing atmosphere at a temperature that is higher than the temperature used to produce the calcined powders and for a period of time that is longer than the period of time conducted for calcining the raw material to produce the calcined powders.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications should be directed to examiner Susy Tsang-Foster, Ph.D. whose telephone number is (571) 272-1293. The examiner can normally be reached on Monday through Friday from 9:30 AM to 6:00 PM.
